

## **Presentation**

You or you and your partner should present for 8 minutes (and there will be 2 minutes for questions for a total of 10 minutes)

The presentation should feel conversational, so DO NOT READ your notes. You should rehearse the presentation so that you are confident (but also so that it feels conversational).

Use lots of visual images

- 1) what was your question and why?  
What animal did you study (note that the *Genus* is capitalized and italicized and the *species* is italicized but not capitalized: *Tursiops truncatus*)
- 2) Methods: How did you address your question?  
Schematic and/or photos of methods  
WHAT WERE YOUR TREATMENTS (independent variables)  
WHAT DID YOU MEASURE (dependent variables)
- 3) Results  
Graphs and /or tables (explain axes)
- 4) Conclusions  
What do your results mean?  
(-bullets are ok)  
Return to your original question  
If appropriate, include a do next

DO NOT APOLOGIZE FOR YOUR EXPERIMENTS  
DO NOT HAVE YOUR VOICE GO UP AT THE END OF A SENTENCE  
TRY NOT TO USE FILLER WORDS (like, um, ya know)
